# VE Day Teacup Design

Design your own VE Day cup. Think about your design and make sure it is bright and eye-catching. You could include flags, important buildings or people who were involved in the Second World War.

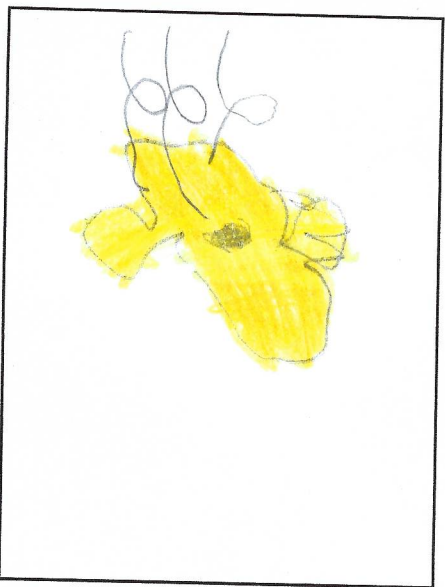

# How to make fire

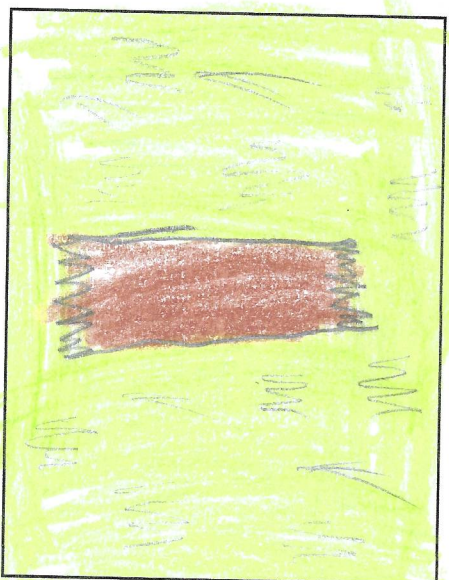

Ryan Whitehall  
12/05/20

1. You will need flint, iron pyrites, horses hoof fungus, a base board and a bundle of tinder.

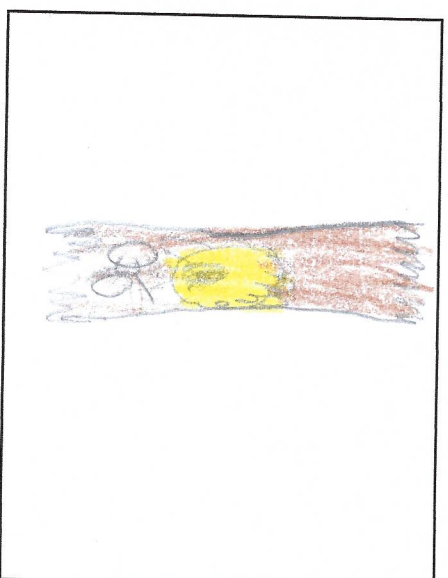

4. Gently blow until fungus begins smoking

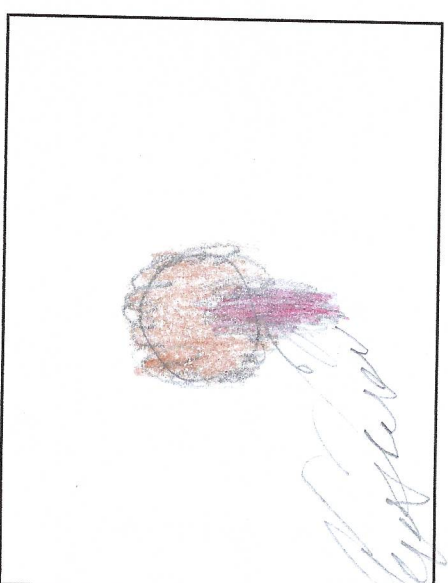

2. Put base board on the ground to protect from damp and cold. You can use some tree bark.

5. Take some tinder bundle scraped from tree bark and put the smoking fungus inside

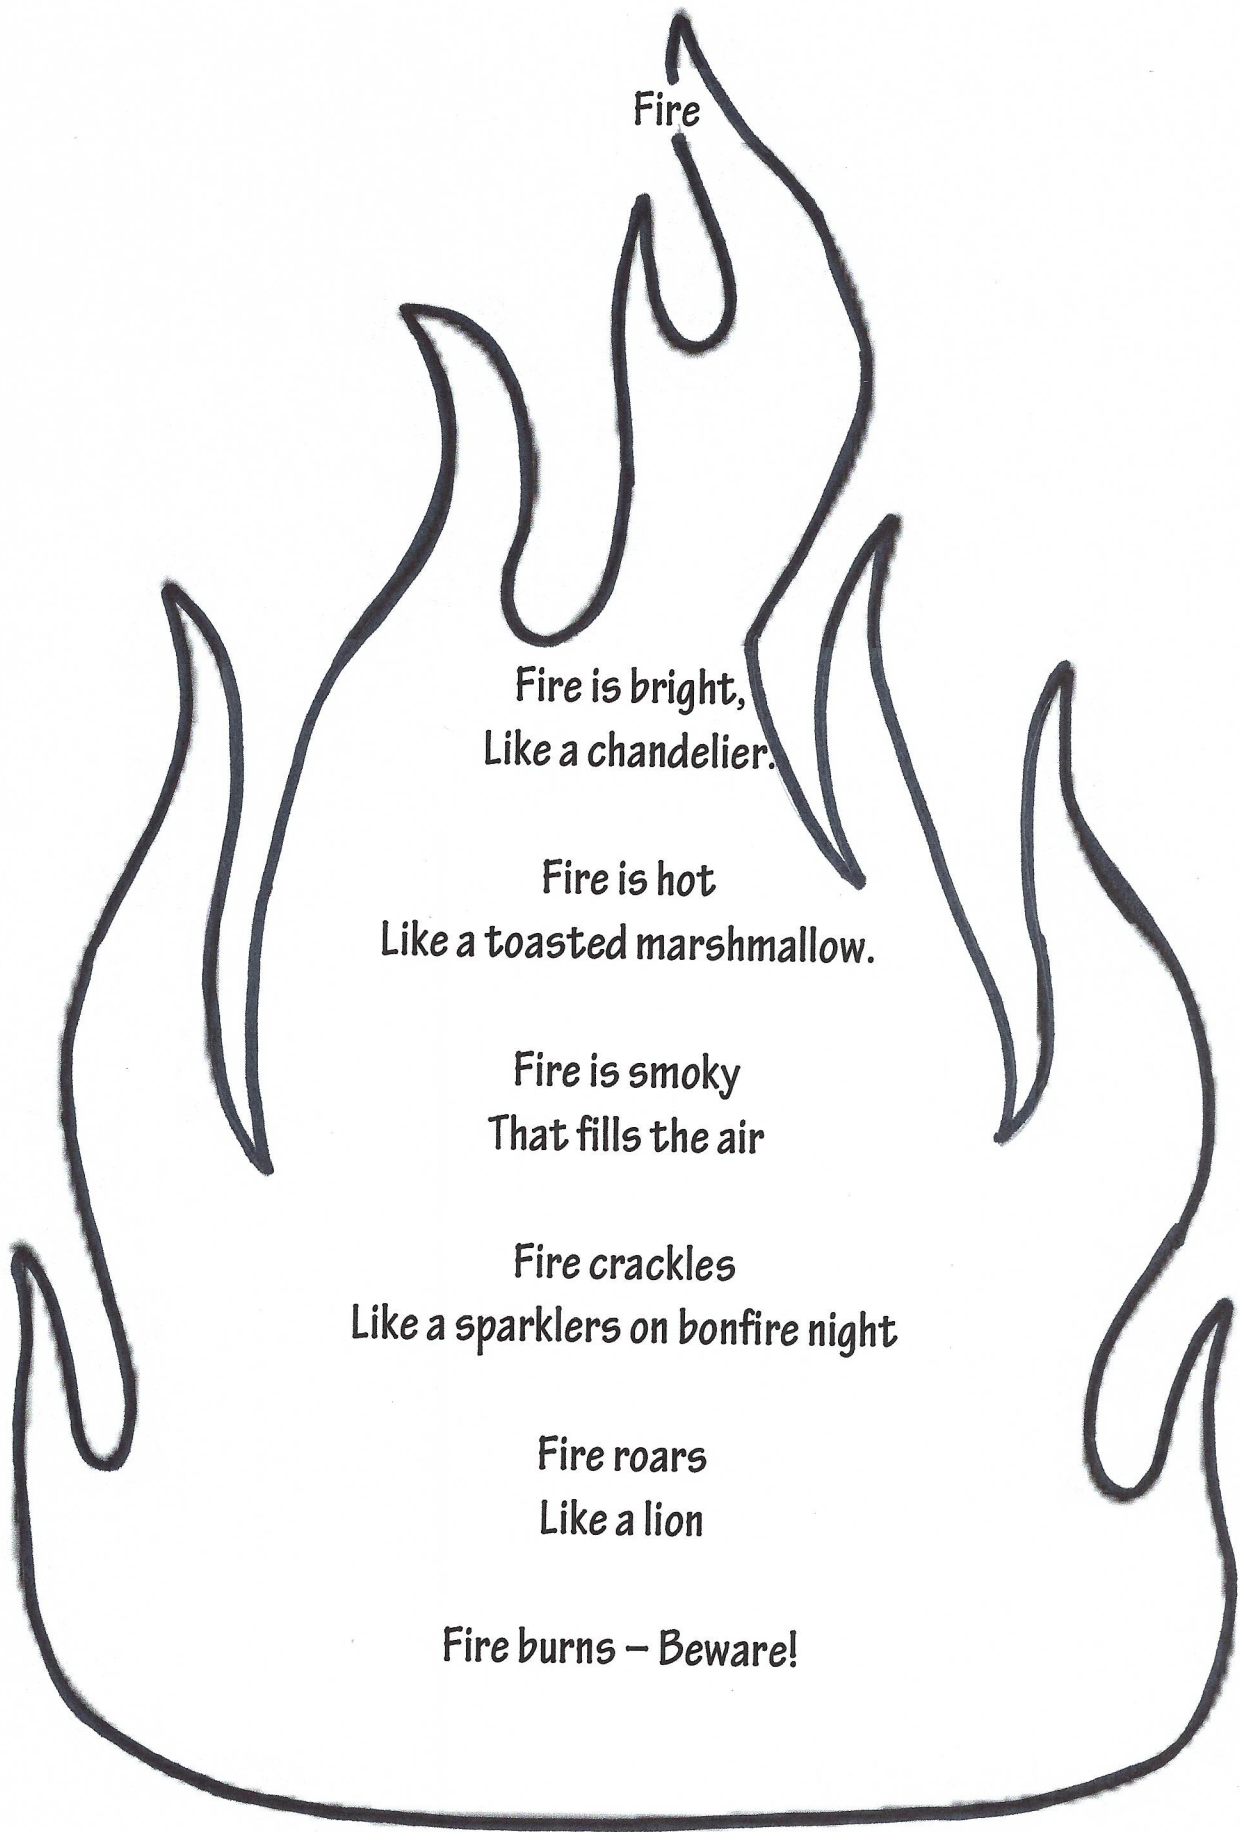

3. Scrape fungus onto base board then scrape flint against it on pyrite until sparks land on fungus

6. Blow gently until tinder catches fire.

Fire

Fire is bright,  
Like a chandelier.

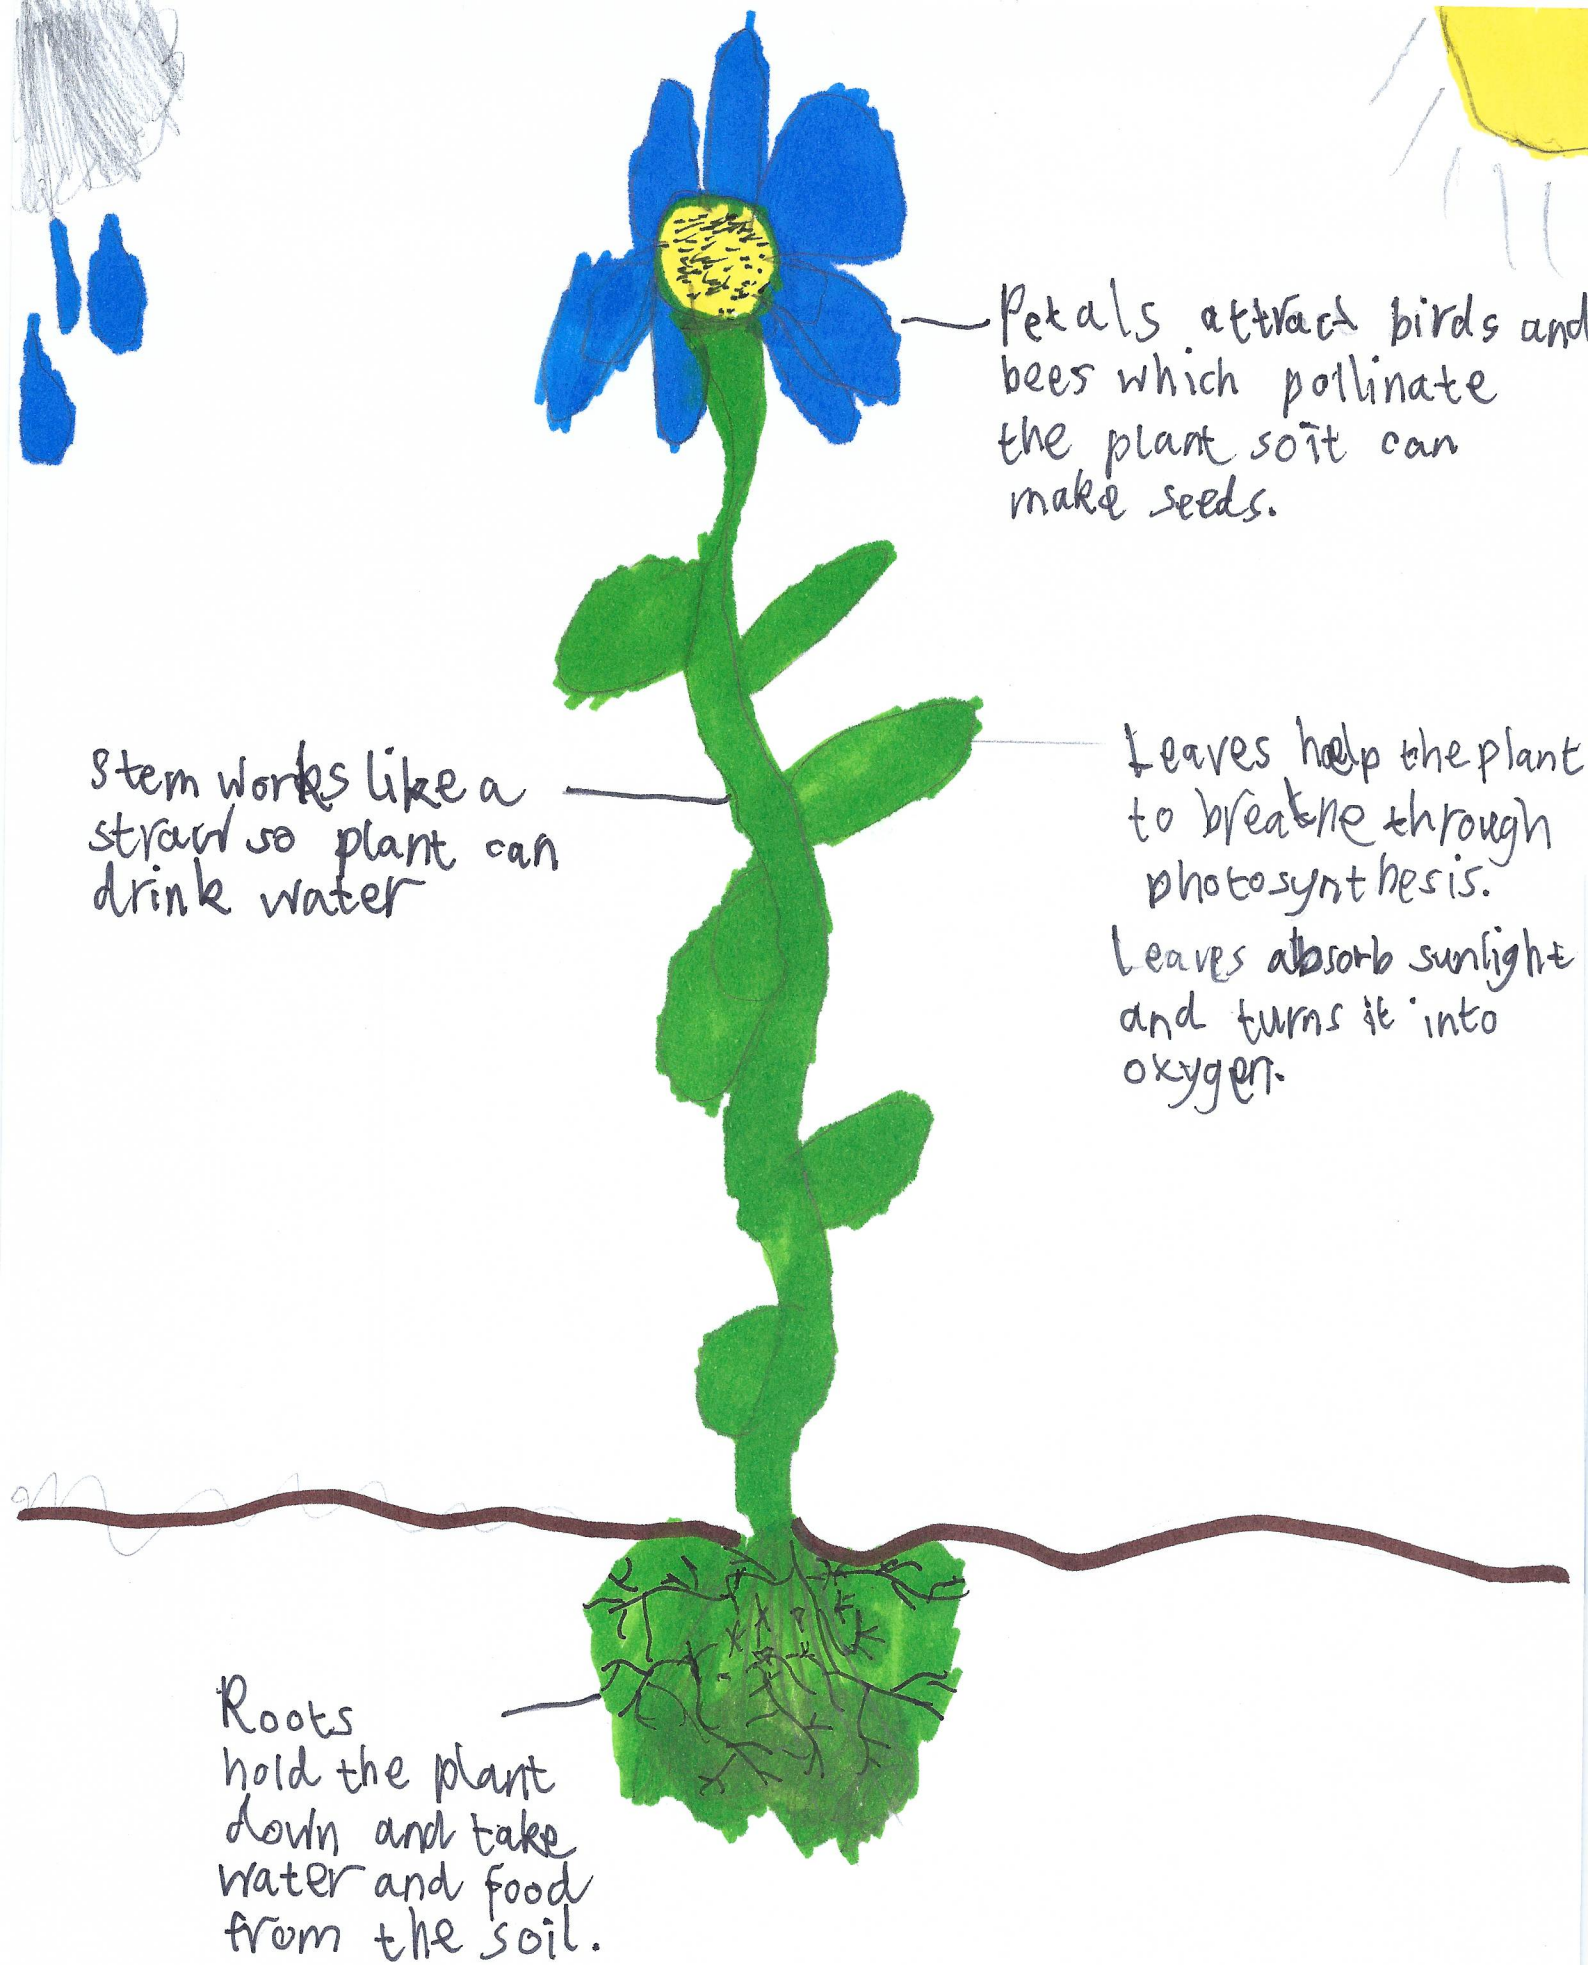

Fire is hot  
Like a toasted marshmallow.

Fire is smoky  
That fills the air

Fire crackles  
Like a sparklers on bonfire night

Fire roars  
Like a lion

Fire burns – Beware!

Petals attract birds and bees which pollinate the plant so it can make seeds.

Stem works like a straw so plant can drink water

Leaves help the plant to breathe through photosynthesis. Leaves absorb sunlight and turns it into oxygen.

Roots hold the plant down and take water and food from the soil.
